UNDERGRADUATE PROGRAM

Level	: Undergraduate
Major	: Language and Literature Education
Code	: 7140217
Mode of Study	: Full-time

Gia Lai, 2025

UNDERGRADUATE PROGRAM

*(Issued together with Decision No. 2178/QĐ-ĐHQN dated August 01, 2025
of the Rector of Quy Nhon University)*

Level	: Undergraduate
Major	: Language and Literature Education
Code	: 7140217
Mode of Study	: Full-time

1. PROGRAM OBJECTIVES

1.1. General objectives

The bachelor's training program in Literature Teacher Education aims to develop teachers with strong political qualities, good health, and a high sense of responsibility. Learners are provided with a comprehensive foundation of knowledge in basic sciences and educational sciences, while developing the capacity to teach Literature effectively at different educational levels. In addition, the program focuses on fostering the ability for self-study and lifelong research thinking, cultivating a sense of professional responsibility and a spirit of serving the community. All of these aim to meet the requirements of fundamental and comprehensive reform of general education, while serving socio-economic development, ensuring national defense and security, and promoting international integration in the new era.

1.2. Specific objectives

The bachelor's program in Literature Teacher Education aims to train graduates who:

- **PO1:** Possess professional knowledge, skills, and practical competencies required for teaching Literature.
- **PO2:** Demonstrate critical thinking, proactive collaboration, and the ability to solve educational issues at school, local, national, and regional levels.
- **PO3:** Have teaching competence, innovative and creative capacity, digital competence, and the ability for lifelong self-learning and research.

- **PO4:** Possess professional ethics, a sense of professional responsibility, and a commitment to serving the community.

2. EMPLOYMENT OPPORTUNITIES AND PROFESSIONAL DEVELOPMENT

Graduates who complete the bachelor's program in Language and Literature Education may take on the following positions:

- Teaching: Directly teach Literature at upper secondary schools. With higher professional qualifications, they may teach at universities, colleges, professional secondary schools, and vocational education institutions.

- Research and professional work: Participate in research at institutes and research centers specializing in language and literature; work at public administrative agencies, socio-political organizations, press and media agencies, publishing houses, or organizations related to culture and education.

- Further study: Have the ability to pursue postgraduate studies at the master's and doctoral levels in fields such as Linguistics, Vietnamese Literature, Foreign Literature, Literary Theory, Theory and Methods of Teaching Literature, and other related disciplines.

3. LEARNING OUTCOMES

The program is designed to ensure that graduates of the Language and Literature Teacher Education program achieve the following learning outcomes:

PLO1: Apply knowledge of general education, foundational disciplinary knowledge, and related field knowledge to perform professional tasks.	PI 1.1: Identify general education knowledge, foundational disciplinary knowledge, and related field knowledge associated with performing professional tasks.
	PI 1.2: Apply general education knowledge, foundational disciplinary knowledge, and related field knowledge to perform professional tasks.
PLO2: Apply disciplinary knowledge and supporting knowledge to develop educational plans and lesson plans for Literature in schools.	PI 2.1: Identify disciplinary knowledge and supporting knowledge related to developing educational plans and Literature lesson plans.
	PI 2.2: Apply disciplinary knowledge and supporting knowledge to develop educational plans and Literature lesson plans.
PLO3: Apply disciplinary knowledge and supporting knowledge to organize educational activities and Literature teaching activities in schools.	PI 3.1: Synthesize disciplinary knowledge and supporting knowledge related to organizing educational activities and Literature teaching activities.
	PI 3.2: Manage the process of organizing educational activities and Literature teaching

	activities.
PLO4: Apply disciplinary knowledge and supporting knowledge to conduct student assessment and evaluation.	PI 4.1: Identify assessment methods and forms oriented toward developing learners' qualities and competencies.
	PI 4.2: Use assessment methods and forms oriented toward developing learners' qualities and competencies.
PLO5: Apply relevant knowledge and pedagogical communication knowledge in the process of learning and professional practice.	PI 5.1: Identify relevant knowledge and communication knowledge, including pedagogical communication of teachers in schools.
	PI 5.2: Apply relevant knowledge and pedagogical communication knowledge to enhance teaching effectiveness and develop relationships among schools, families, and society.
PLO6: Conduct scientific research and demonstrate critical thinking.	PI 6.1: Conduct scientific research to contribute to improving learning effectiveness and professional practice.
	PI 6.2: Demonstrate critical thinking to develop learners' comprehensive competencies.
PLO7: Apply digital competence to address professional issues within the field of specialization.	PI 7.1: Identify digital technology tools and artificial intelligence tools to support teaching, research, and professional practice.
	PI 7.2: Use digital technology tools and artificial intelligence tools to improve the quality of learning, research, and professional practice, promote educational innovation, and create a modern, effective, and creative learning environment.
PLO8: Demonstrate autonomy, self-learning, self-research, personal responsibility, and effective collaboration in learning and working environments.	PI 8.1: Demonstrate autonomy, self-learning, self-research, and personal responsibility to proactively acquire knowledge, develop independent thinking, and build effective learning methods.
	PI 8.2: Demonstrate collaborative ability to enhance learning quality, support learners' comprehensive development, and build an

	educational environment reflecting the distinctive culture of the school.
PLO9: Demonstrate professional ethics, professional responsibility of teachers, and community service activities contributing to comprehensive human development.	PI 9.1: Identify issues related to teachers' professional ethics, professional responsibility, and awareness of community service.
	PI 9.2: Demonstrate professional ethics, professional responsibility, and community service to guide learners' character development, build a positive learning environment, and contribute to comprehensive human development.

4. PROGRAM DURATION AND TOTAL ACADEMIC WORKLOAD

4.1. Program Duration: 4 years

4.2. Total academic workload: 138 credits (*excluding 3 credits of Physical Education and 9 credits of National Defense and Security Education*).

Program structure	Credits
General Knowledge	24
Professional Knowledge	114
- Fundamental knowledge	28
- Specialized knowledge (if any)	42
- Supplementary Knowledge	38
- Graduation thesis, Alternative courses	6
Total	138

5. ADMISSION REQUIREMENTS

Applicants who wish to apply for admission to the Language and Literature Teacher Education program must meet the following requirements:

- Have graduated from Vietnamese upper secondary school or hold a foreign upper secondary school diploma recognized as equivalent.
- Hold a diploma from an intermediate-level vocational program in a related field and have completed the required amount of upper secondary cultural knowledge in accordance with legal regulations.
- Be in good health to study according to current regulations.
- Meet the admission threshold and other requirements for teacher education

programs in accordance with the Regulations on University Admission and College Admission for Early Childhood Education issued by the Ministry of Education and Training, and the University Admission Regulations of Quy Nhon University.

6. MODE OF STUDY, GRADUATION REQUIREMENTS

6.1. Mode of Study: The training method is based on the credit system.

6.2. Graduation Requirements (professional requirements, prerequisite courses, foreign language proficiency, and information technology standards)

- *Professional requirements:* Students must accumulate all required courses and the total study workload according to the training program; achieve a cumulative grade point average (GPA) of at least 2.00 on a 4-point scale, and meet all the program learning outcomes specified for the major.

- *Physical Education and National Defense and Security Education:* Students must complete all Physical Education courses and obtain a certificate of National Defense and Security Education in accordance with current regulations.

- *Foreign language requirement:* Achieve the required level of foreign language proficiency in accordance with the current regulations of Quy Nhon University.

- *Information technology requirement:* Meet the standard of basic information technology application skills in accordance with the current regulations of Quy Nhon University.

- *Conduct and ethics requirement:* At the time of graduation consideration, students must not be under criminal prosecution and must not be under disciplinary suspension from study.

7. TEACHING METHODS AND LEARNING ASSESSMENT

7.1. Teaching Methods

No	Teaching Strategy	Teaching Methods
1	Direct Instruction: Direct instruction is a teaching process in which the instructor directly delivers information and fundamental knowledge to learners. In this approach, the teacher plays a central role in controlling, guiding, and organizing instructional activities. Through presentation, explanation, and detailed guidance, the teacher helps learners access, acquire, and clearly understand the lesson content. This teaching strategy is effective for providing systematic knowledge and introducing new skills, thereby establishing a solid foundation for learners to apply such knowledge to professional practice and develop practical competencies.	- Lecture/Presentation - Explanation and Illustration - Question–Answer Interaction - Problem-posing - Simulation Demonstration
2	Indirect Instruction:	- Case-based learning

	Indirect instruction is a teaching strategy in which learners are provided with opportunities to explore and construct knowledge through learning activities without relying entirely on the lecturer's direct transmission of information. In this strategy, the lecturer acts as a facilitator who organizes, guides, and supports the learning process rather than delivering all the instructional content directly. Learners are encouraged to actively engage in the learning process, apply critical thinking skills, and develop their ability to analyze and solve problems. Through various learning activities, this strategy helps learners enhance their capacity for self-directed learning and independent inquiry, while also fostering a stronger sense of responsibility and autonomy in their learning.	- Problem-based learning - Guiding questions - Online teaching - Assignments - Discussion - Debate - Project-based learning
3	Experiential Learning: Experiential learning consists of four stages: Concrete experience, in which learners participate in practical activities such as group discussions, laboratory practice, or field trips; Reflective observation, where learners reflect on and analyze the results, behaviors, and emotions from the experience; Conceptualization, where learners draw lessons and theoretical insights from reflection; and Active experimentation, where learners apply knowledge to new situations for testing and adjustment. This approach not only develops knowledge and skills but also enhances learners' attitudes.	- Experiential learning - Internship - Fieldwork / Field trips - Simulation - Practice - Discussion - Project
4	Interactive Teaching: Interactive teaching is a strategy in which learners not only receive knowledge from instructors but also actively participate in discussions, dialogues, and collaboration with peers and instructors. The instructor organizes and facilitates the learning process, creating opportunities for interaction and continuous feedback. This method helps develop communication, collaboration, critical thinking, and problem-solving skills while enhancing learners' confidence and initiative.	- Interactive lectures - Group assignments - Discussion - Debate - Practice - Internship - Fieldwork - Project
5	Self-directed Learning: Self-directed learning is a learning strategy in which learners take responsibility for	- Online learning - Homework

	identifying goals, planning, and controlling their own learning process with minimal support from instructors. Learners actively seek learning resources and complete learning tasks through assignments, projects, or problems proposed by instructors. This method helps develop learners' self-learning and research abilities while promoting autonomy, personal responsibility, and independent problem-solving skills.	assignments - Self-directed learning -Practice -Internship -Fieldwork - Project
--	--	--

7.2. Learning Assessment

The assessment of students' learning outcomes is conducted in accordance with the current Undergraduate Training Regulations of Quy Nhon University.

7.2.1. Course Assessment and Grading

Course Assessment and Grading			
1. For theoretical courses or courses combining theory and practice	The overall course grade (hereinafter referred to as the course grade) consists of two components: continuous assessment and the final examination.	Continuous assessment: Accounts for 30%, 40%, or 50% of the course grade. Final examination: Accounts for 70%, 60%, or 50% of the course grade.	The assessment methods, forms of assessment, and the weight of each component are specified in the detailed syllabus of each course.
2. For courses consisting only of laboratory work or practice	The average score of all practical assignments during the semester, rounded to one decimal place, is considered the final grade of the practical course.		
3. For special courses such as internships, field trips, course projects, or course design projects	The faculty managing the course proposes the assessment method, and the Rector makes the final decision.		

4. Assessment of graduation projects and graduation theses	- The assessment of the graduation project and graduation thesis is conducted by a committee established by decision of the Rector. - The committee consists of three members: a Chairperson, a Reviewer, and a Secretary (<i>the supervisor is not a member of the committee</i>). The committee organizes the defense and evaluation of the graduation project/thesis only when all members are present.	The final grade for the graduation thesis/project is calculated as the average of the component scores given by the supervisor and the members of the evaluation committee: $\text{Final grade} = \frac{\text{Supervisor's score} + \text{Scores of the committee members (3 scores)}}{4}$ Each component score is graded on a 10-point scale, rounded to one decimal place. The final evaluation score for the graduation thesis/project is also calculated on the 10-point scale, rounded to one decimal place, and then converted into the corresponding letter grade scale.
--	--	---

Grading Scales Used

Assessment Scales	10-point scale: This scale ranges from 0 to 10 (with one decimal place) and is used to evaluate and record the continuous assessment scores, final examination scores, and overall course grades.
	Letter grade scale: This scale is used to classify course results and corresponds to the course grades on the 10-point scale.
	4-point scale: This scale is used to calculate the semester GPA and cumulative GPA, evaluate students' academic performance after each semester or academic stage, and determine the graduation classification.

Conversion Rules Between Grading Scales

10-point Scale	Letter Grade	4-point Scale	Result
9 - 10	A+	4	Pass
8 – 8.9	A	3.5	
7 – 7.9	B+	3	
6 – 6.9	B	2.5	
5 – 5.9	C	2	

4 – 4.9	D	1.5	
0 – 3.9	F	0	Fail

7.2.2. Assessment Methods

Assessment Methods	
Observation Method	This method assesses students' attendance and learning attitudes, including their learning awareness, independence, and creativity. It involves checking class attendance, preparedness for lessons, participation in discussions, and contributions to classroom activities.
Assignment Assessment	This method evaluates the extent to which students complete assignments given by the lecturer related to lessons during and after class. These assignments may be completed individually or in groups and are graded based on predetermined criteria.
Presentation Assessment	Students are required to work individually or in groups to present their results to other students. This activity not only assesses the level of students' mastery of specialized knowledge but also evaluates the development of skills such as communication, negotiation, and teamwork.
Written Test Methods	Written assessment includes essay tests and objective multiple-choice tests, or a combination of both.
Practical Assessment	Students are evaluated based on criteria such as the accuracy of procedures and operations, outcomes, and practical reports.
Oral Assessment	Students are assessed through interviews, questions, and direct responses. This method is used in some courses to evaluate students' overall competence, including knowledge and communication and presentation skills.
Group Work Assessment	This method is used in group learning activities to evaluate students' teamwork skills.
Essay/Term Paper Assessment	Students are assessed through written reports on issues related to a course or practical problems in order to draw conclusions, provide comments, and propose solutions for

	implementation or improvement. The evaluation of essays includes the assessment of structure, content, conclusions, and presentation format.
Project Product Assessment	Through the products created by students, lecturers evaluate the level of development, creativity, and effectiveness of the completed products. The criteria and standards for evaluating products are diverse and depend on specific real-world contexts.

11. GUIDELINES FOR PROGRAM IMPLEMENTATION

This training program is applied from the 2025 admission cohort for students majoring in Literature Teacher Education.

The training process is implemented based on the curriculum designed in accordance with the program objectives, target learners, human resource requirements, and the specific requirements of the major. For elective courses, depending on the actual conditions, development trends, and social demands, the Faculty will advise students in selecting appropriate courses.

The Dean of the Faculty is responsible for organizing and guiding the principles for developing detailed course syllabi to ensure that the objectives, contents, and requirements are met, while also addressing the needs of learners and society.

The training program is regularly reviewed, evaluated, and updated; the results of the review and evaluation are used to improve and enhance the quality of education. The cycle for comprehensive evaluation of the training program is no more than five (05) years.

Gia Lai, August 01, 2025

RECTOR

Assoc. Prof. Dr. Doan Duc Tung
