QUY NHON UNIVERSITY

UNDERGRADUATE PROGRAM

Level	: Undergraduate
Major	: Preschool Education
Code	: 7140201
Mode of Study	: Full-time

Gia Lai, 2025

UNDERGRADUATE PROGRAM

*(Issued together with Decision No. 2178/QĐ-ĐHQN dated August 01, 2025
of the Rector of Quy Nhon University)*

Level : **Undergraduate**
Major : **Preschool Education**
Code : **7140201**
Mode of Study : **Full-time**

1. PROGRAM OBJECTIVES

1.1. General Objective

The Preschool Education training program aims to train learners with sound political qualities and ethics, good health, knowledge of basic sciences and specialized educational sciences, competence in organizing educational and teaching activities in preschools, the ability for self-study and lifelong learning and research, professional responsibility, and a spirit of community service, thereby meeting the requirements of educational innovation, the country's socio-economic development needs, and the orientation toward international integration.

1.2. Specific Objectives

1) PO1: Possess general knowledge, foundational sciences, and specialized disciplinary knowledge for study, research, and exposure to professional practice in Preschool Education.

2) PO2: Possess skills in applying scientific knowledge to organizing teaching and learning activities in preschools.

3) PO3: Possess skills in accessing and innovating teaching methods, digital competence, and the use of modern teaching equipment.

4) PO4: Possess the capacity for self-study and lifelong self-directed research, love for the profession, and a sense of community service.

2. JOB OPPORTUNITIES AND PROFESSIONAL DEVELOPMENT

Upon completion of the Preschool Education training program, graduates may undertake the following positions:

- Teaching in the system of public and private preschools nationwide;
- Teaching preschool children at international schools;
- Working at educational management agencies;
- Working at domestic and international organizations and centers in the field of education;
- Continuing to pursue Master's programs at reputable universities in Vietnam and abroad.

3. PROGRAM LEARNING OUTCOMES

PLO1: Form knowledge and skills in applying general sciences and foundational sciences to professional practice in Preschool Education. Core courses: <i>Aesthetics;</i> <i>Foundations of Linguistics;</i> <i>Basic Mathematics I;</i> <i>Basic Music;</i> <i>Basic Fine Arts.</i>	PI 1.1: Summarize (understand, remember, systematize) the content of general and foundational scientific knowledge.
	PI 1.2: Apply general and foundational scientific knowledge to specialized study and research.
PLO2: Apply knowledge of the social sciences and humanities in children's education. Core courses: <i>Vietnamese Phonetics and Lexicology;</i> <i>Children's Literature.</i>	PI 2.1: Explain disciplinary knowledge of the social sciences and humanities in children's education.
	PI 2.2: Solve problems relating to social science and humanities knowledge in children's education.
PLO3: Apply mathematical and natural science knowledge in children's education and care. Core courses: <i>Mathematical Games;</i> <i>Child Nutrition.</i>	PI 3.1: Explain mathematical and natural science knowledge in children's education and care.
	PI 3.2: Solve problems relating to mathematics and natural science in children's education and care.
PLO4: Apply knowledge of teaching methods at the preschool level. Core courses:	PI 4.1: Explain knowledge of methods for teaching subject areas at the preschool level.

<i>Methods of Children's Language Development 1;</i> <i>Methods of Developing Mathematical Concepts in Children 1;</i> <i>Methods of Music Education;</i> <i>Methods of Organizing Visual Arts Activities for Preschool Children.</i>	PI 4.2: Develop and implement educational programs and activity plans, and design teaching activities at the preschool level.
PLO5: Use digital technology in learning and professional practice. Core courses: <i>Application of Digital Technology in Preschool Education.</i>	PI 5.1: Identify the functions of certain digital devices used in educational activities.
	PI 5.2: Use digital technology tools in learning and educational activities.
PLO6: Demonstrate diligence, proactiveness, self-study and self-research capacity, professional responsibility, love for the teaching profession, and a spirit of community service. Core courses: <i>Teaching Internship 2.</i>	PI 6.1: Demonstrate diligence, proactiveness, professional responsibility, love for the profession, and a spirit of community service.
	PI 6.2: Apply self-study and self-research capacity to solving problems in learning and educational activities.

4. PROGRAM DURATION AND TOTAL ACADEMIC WORKLOAD

4.1. Program duration: 04 years

4.2. Total academic workload: 138 credits (excluding Physical Education and National Defense and Security Education).

Program Structure	Credits
General Education Knowledge	25
Professional Knowledge	113
Fundamental Knowledge	24
Major and Specialized Knowledge (if any)	45
Supplementary Knowledge	29
Internship / Field Practice	9
Graduation Thesis / Alternative Courses	6
Total:	138

5. ADMISSION REQUIREMENTS

Applicants must have graduated from upper secondary school or an equivalent level in accordance with the current admissions regulations of Quy Nhon University.

6. MODE OF STUDY AND GRADUATION REQUIREMENTS

6.1. Mode of Study: Credit-based system.

6.2. Graduation Requirements: To be eligible for graduation, students must satisfy the following requirements:

- *Academic Requirements:* In accordance with the current Regulations on Undergraduate Education issued by the Ministry of Education and Training, and the current Regulations on Undergraduate Education and Undergraduate Training of Quy Nhon University. Students must successfully complete all compulsory courses and the total academic workload of the program; achieve a cumulative Grade Point Average (GPA) of at least 2.00 for the entire program; and attain all Program Learning Outcomes (PLOs).

- *Physical Education and National Defense and Security Education:* Fulfill the requirements for Physical Education and obtain the Certificate of National Defense and Security Education.

- *Foreign Language Requirement:* Meeting the foreign language proficiency standard as prescribed by the University.

- *Information Technology Requirement:* Students must meet the basic information technology competency standards as stipulated in Circular No. 07/2015/TT-BGDĐT, as well as other specific regulations of the training institution.

Conduct and Ethical Requirements: Meeting the information technology proficiency standard as prescribed by the University.

7. TEACHING METHODS AND LEARNING ASSESSMENT

7.1. Teaching Methods

No.	Teaching Strategy	Teaching Methods
1	Face-to-Face Teaching: Face-to-face teaching is the process in which lecturers directly deliver knowledge and basic information to learners, with lecturers playing an active role in controlling, guiding, and implementing	- Lecture / Oral exposition / Presentation - Explanation and

	teaching activities. Through presentation, explanation, and detailed guidance, lecturers help learners approach and clearly understand lesson content. This teaching strategy is effective in providing systematic knowledge, guiding new skills, and creating a solid foundation for learners to apply in professional work, thereby developing practical skills.	illustration - Dialogue (Q&A) - Problem-posing - Simulation method - Guided practice (modeling)
2	Indirect Teaching: Indirect teaching is a teaching strategy in which lecturers create a learning environment for learners to proactively access knowledge without direct intervention. This method encourages learners to participate actively in the learning process and to use critical thinking and problem-solving skills independently. Instead of lecturers directly transmitting knowledge, learners explore, study, and apply what they have learned on their own. This strategy not only develops learners' capacity for self-study and self-research but also enhances their awareness and personal responsibility in learning and professional development.	- Case-based learning - Problem-based learning - Guiding questions - Assignment - Discussion - Debate - Project - Online learning
3	Experiential Learning: Experiential learning consists of four cycles: Concrete experience, in which learners participate in practical activities such as group discussion, experimental practice, or field trips; Reflective observation, in which learners reflect on and analyze results, behaviors, and feelings arising from the experience; Conceptualization, in which learners derive lessons and theories from the reflective process; and Active experimentation, in which learners apply knowledge to new situations for testing and adjustment. Experiential learning not only helps develop knowledge and skills but also enhances learners' attitudes.	- Experiential learning - Internship - Field Practice - Simulation - Practice - Discussion - Project
4	Interactive Teaching and Learning: Interactive teaching and learning is a strategy in which learners not only receive knowledge from lecturers but also actively participate in discussions, dialogue, and collaboration with	- Interactive lecture - Group Assignment - Discussion - Debate /

	peers and lecturers. Lecturers organize and coordinate the learning process, creating opportunities for learners to interact and provide continuous feedback. This strategy helps develop communication skills, collaboration, critical thinking, and problem-solving, while enhancing learners' confidence and proactiveness.	argumentation - Practice - Internship - Field Practice - Project
5	Self-Study: Self-study is a learning strategy in which learners exercise autonomy in identifying goals, developing plans, and controlling their own learning process with minimal support from lecturers. Learners proactively seek learning resources and carry out learning tasks through exercises, projects, or problems assigned by lecturers. Self-study not only develops learners' capacity for self-learning and self-research but also promotes autonomy, personal responsibility, and independent problem-solving ability.	- Online learning -Homework assignments -Self-directed learning - Practice - Internship - Field Practice - Project

7.2. Learning Assessment

Assessment of learning outcomes complies with the current undergraduate training regulations of Quy Nhon University.

7.2.1. Course Assessment and Grading

Course Assessment and Grading			
1. For theoretical courses or courses combining theory and practice	The composite course assessment score (hereinafter referred to as the course score) consists of two components: the formative assessment score and the final examination score.	Formative Assessment Score: weighted at 30%, 40%, or 50% of the course score.	The assessment method, assessment format, and weighting of each component score are specified in the detailed syllabus of each course.
		Final Examination Score: weighted at 70%, 60%, or 50% of the course score.	

2. For courses consisting only of experiments or practice	The arithmetic mean of the scores of practical exercises during the semester, rounded to one decimal place, is the score of the practical course.	
3. For special courses such as internships, field practice, course projects, and course theses	The department managing the course shall propose the course assessment method, and the Rector shall make the decision.	
4. Assessment of graduation projects and graduation theses	- Assessment of graduation projects and graduation theses shall be carried out by a committee established by decision of the Rector. - The committee consists of 03 members: the Chair, the reviewer, and the secretary (the supervisor does not serve on the committee). The committee shall organize the defense and assess the graduation project or thesis only when all members are present.	The assessment score for the graduation thesis or project is the arithmetic mean of the component scores given by the committee members and the supervisor ($[\text{Supervisor's score} + \text{Scores of committee members (3 score columns)}]/4$). Component scores are graded on the 10-point grading scale to one decimal place; the graduation thesis/project assessment score is calculated on the 10-point grading scale, rounded to one decimal place, and converted into the letter grade scale.

Grading Scales Used

Grading Scale	10-point Grading Scale: Includes scores from 0 to 10 (with one decimal digit), used to assess and record formative assessment scores, final examination scores, and course scores.
	Letter grade scale: Used to classify courses in a manner corresponding to the course score on the 10-point grading scale.
	4-point scale: Used to calculate semester GPA and cumulative

	GPA, to assess student learning outcomes after each semester and study stage, and to determine graduation classification.
--	---

Conversion Rules among Grading Scales

10-point Grading	Letter grade scale	4-point scale	Result
9- 10	A ⁺	4	Pass
8-8,9	A	3,5	
7-7,9	B ⁺	3	
6 - 6,9	B	2,5	
5 - 5,9	C	2	
4-4,9	D	1,5	
0 - 3,9	F	0	Fail

7.2.2. Assessment Methods

Assessment Methods	
Observation method	Assesses learners' diligence and learning attitude, including their learning awareness, independence, and creativity, such as attendance, preparation for lessons, participation in discussion, and contribution to lesson development in class.
Assignment assessment	Assesses the extent to which learners complete assignments given by lecturers related to lessons during and after class. These assignments may be completed individually or in groups and graded based on pre-announced criteria.
Presentation assessment	Learners are required to work individually or in groups and present the results before other learners. In addition to assessing learners' attainment of specialized knowledge, this activity also assesses the development of skills such as communication, negotiation, and teamwork.
Written Examination	Written Examination include essay-type tests and objective multiple-choice tests, or a combination of both.

Practical assessment	Learners are assessed based on criteria relating to the correctness of operations and procedures, outcomes, and practical reports.
Oral Examination	Learners are assessed through interviews, questions, and direct answers. This method is used in certain courses to assess learners' overall competence, including knowledge and communication and presentation skills.
Group-work assessment	Used when implementing group-based teaching activities to assess learners' teamwork skills.
Essay / major assignment assessment	Learners are assessed through writing a report on an issue within a course or a practical problem in order to draw conclusions, provide comments, and propose solutions for implementation or improvement of the stated issue. Essay assessment includes assessment of structure, content, conclusions, and presentation format.
Learning project product assessment	Through the products completed by learners, lecturers assess the level of development, creativity, and effectiveness of the completed product. Criteria and standards for product assessment are highly diverse. Product assessment is based on the specific real-world context.

Matrix of Relationships between Assessment Methods and Program Learning Outcomes (PLOs)

Assessment Method	Program Learning Outcomes (PLOs)					
	1	2	3	4	5	6
Observation method				x	x	x
Assignment assessment	x	x	x	x		x
Presentation assessment	x	x	x	x	x	x
Written Examination	x	x	x	x		

Practical assessment				X	X	X

Total: 11 credits (05 compulsory + 06 elective)			11									

11. GUIDELINES FOR TRAINING PROGRAM IMPLEMENTATION

- This training program shall be applied from the 2025 admission cohort for the Preschool Education teacher-training major.
- The training process is implemented on the basis of a curriculum designed to align with the training objectives, learner profile, human resource requirements, and the discipline's specific criteria.
- For elective courses, based on development trends, social needs, and practical conditions, academic advisors shall advise learners in selecting appropriate courses.
- The Head of Faculty is responsible for organizing and guiding the development of detailed course syllabi, ensuring that the objectives, content, and training requirements are met while also satisfying learners' study needs and society's development requirements.
- The training program is reviewed and updated periodically every 2 to 3 years to ensure its relevance to the development of Preschool Education teacher training and to meet socio-economic development needs and the requirements for innovation in Preschool Education teacher training.
